## Features:

Shell: Aluminium alloy with Cadmium Plating and passivated.
Insulator: Polycarbonate with high insulation resistance.
Contacts: High conductivity copper alloy plated with silver.
Screw \& Washers: Steel with Cadmium plated and passivated.

## PWA RECTANGULAR CONNECTORS

Connector rectangular are meant for low frequency applications and operation in electrical networks of D.C/A.C, and pulse current with frequency up to 3 MHz , at voltage up to 600 V and current up to 6 Amps . These connectors are meant for use in all types of climatic conditions.

Temp range: $-\mathbf{6 0}{ }^{\circ}$ to $\mathbf{+ 8 5}{ }^{\circ}$ C.
Amp resistance of contacts: $\mathbf{0 . 0 1 \Omega}$ Max.
Capacitance between any adjacent contact 10PF Max.
Max. Operating current at single contact: 7.7 Amps.
Insulation withstanding a testing voltage of $\mathbf{2 1 0 0}$ volts (peak) at normal climatic condition.
Min. operating life of connectors: $\mathbf{5 0 0 0}$ hours.
Min. number of connection / disconnection : $\mathbf{1 0 0 0}$.
Suitable for wiring wire cross section not exceeding $\mathbf{0 . 7 5} \mathbf{M M}^{2}$

| PART No. | NUMBER OF <br> CONTACTS | TYPE OF <br> CONTACTS | FIG |

## RECTANGULAR CONNECTORS

The PTT 14 type connectors are intended for live electrical connections (interrupting capacity being 250 W per each contact pair) in low - frequency, low-voltage electrical and radio electronic equipment.

## TECNICAL SPECIFICATIONS:

Current per contact pair : 5.0 A (max)

## INSULATION RESISTANCE:

Under normal conditions : 500 MQ (min.)
At raised temperature : 100 MQ (min.)
Temperature range $\quad: \quad 60^{\circ}$ to $+100^{\circ} \mathrm{C}$ (Amb.)

## 234 - SERIES CONNECTORS

These Connectors one re-engineered to eliminate difficulties in soldering to cables /wires that were encountered with 1 HCL1 type connectors. It is not necessary to dismantle the connectors for soldering. The reliability has been incorporated into this new design which ensures, easy and quick Soldering, complete inter changeability with ' HCL1 type connectors. These connectors meet all relevant electrical requirements specified in JSS 50812.

## PANEL CUTOUT FOR RECEPTACLE

1. MILITARY STANDARD - CONFORMING TO JSS 50812
